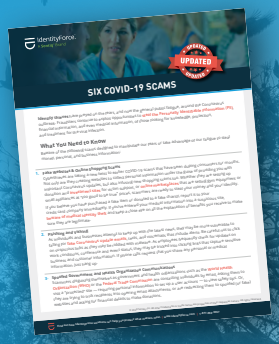
- **16 Billion** consumer credentials are circulating on the Dark Web

COVID-19 SCAM PROTECTION RESOURCES



Tip Sheet | 6 Scams Happening Now

Infographic | Top COVID-19 Digital Scams

Now is the time to take protecting all you've built seriously. Your company recognizes the exponential increase in fraud and scams in 2020, and the vulnerabilities that result from having sensitive personal information exposed. It's why **IdentityForce** is part of the 2021 employee benefit wheelhouse. We're here to provide you with world-class identity theft protection plans built to proactively monitor, alert, and help you fix any identity theft compromises.

WHY NOW?

Our identities have become more than just a name, birthdate, and social security number. Today it includes voice signatures and fingerprints, personal property records, health records, and even social media data. All of these details can be capitalized on by criminals to commit identity fraud, whether used directly in forms of synthetic identity theft, or used in social engineering attempts to extract money or personal details that provide additional opportunities for identity crimes.

ID THEFT IMPACT

You don't want to deal with a lifetime of damage that could result from identity theft. You most likely even know someone who has already been a victim of identity theft themselves, or you at least know someone who has had their good name compromised. Security incidents, scams, and fraud continue to grow. As our world becomes increasingly digitalized, and virtual, it's even more important to have **IdentityForce** in your corner.

We not only proactively monitor the Dark Web, credit reports, and real-time fraud issues, but we will help you fix any compromises to your personal information. All without the hassle of making phone calls, completing paperwork, and all the heavy lifting needed to make sure your identity is restored.

LOST TIME

6 MONTHS and **100** to **200** Hours Worth of Work
